

| Table IV. Treatment of selected causes of metabolic alkalosis | |
|--|--|
| Disease | Treatment |
| Adrenal tumor (Conn's syndrome) | Spironolactone/epplerone vs adrenalectomy |
| Bartter/Gitelman syndrome | Liberalized salt and potassium intake, magnesium supplements, spironolactone |
| Glucocorticoid remediable aldosteronism | Glucocorticoid administration |
| Apparent mineralocorticoid excess | Thiazides and spironolactone |
